Analysis

Total number of employees: 142, of whom 44 are still with the project or have been transferred, or have been promoted and transferred. The subsequent history of the remainder breaks down as follows -

In employment 35 Retired 3 Others 6
 In further education or training 9
 Present status unknown 23 - leaving a residue of about
 20 who are known definitely to be unemployed at present.

These figures appear to suggest that slightly more than half (or 54%) of the individuals who join the project as long term employed do not return to long term unemployment having left the project.

James Debney,
 Senior Supervisor

March 8th, 1988
